

STUDY TOUR

PEDAGOGICAL AND ACADEMIC
OBJECTIVES OF THE WEEK

job

International
Osteopathic
Medical School

جامعة عجمان
AJMAN UNIVERSITY

This first Study Tour will allow students, interns and Doctors of Ajman University College of Dentistry to :

- Discover the facilities and identity of an osteopathic training institution ;
- To understand the close links between the cranio-mandibular approach in osteopathy and dentistry ;
- To participate in clinical consultations supervised by experienced teachers ;
- Learn how to perform temporomandibular dysfunction treatment techniques and cranial osteopathy techniques that are very useful in the practice of dental surgery, orthodontics and occlusodontia ;
- To participate in a professional conference on bruxism and an interdisciplinary approach ;
- To visit hospital services related to IOB Institution ;
- To participate in the operation of the dissection laboratory.

The main objective is a total immersion of students in IOB and to promote academic and pedagogical exchanges.

DAY 1

TUESDAY 02-04-19

16h00 - 18h30 : Theoretical course on osteopathy applied to the anatomy and neurology of the manducatory machine system : the role of osteopathic medicine with dental medicine (1st problematic), temporomandibular dysfunctions (2nd problematic) and the SBS with cranio-cervical adaptations (3rd problematic).

Dr. Staf, M. Lancelin and M. Piscione
